

# StreetTrek Web™ WEB-BASED REAL-TIME ASSET TRACKING SOLUTION

The premier solution to put your fleet or other mobile assets at your fingertips, with no need for client installations.

StreetTrek Web enables you to transform Motorola MOTOTRBO™ Professional Digital Two-Way Radio Systems into a powerful tool for receiving real-time information about portable and mobile assets and personnel, without the need for client installations at your facility.

## Locate assets 24/7 with high-resolution Google Earth mapping

Track the location of every radio in your system with high-resolution Google Earth images combined with satellite and street-level maps – the most detailed imaging and mapping tools available for precision tracking. Real-time 24/7 access to data enables you to protect your assets and keep personnel safe.

## Access anywhere

The StreetTrek Web service can be accessed from virtually all web-enabled devices, including desktop computers, notebooks, tablets and smartphones.

## Advanced tracking capabilities

Street directionality and landmark identification integrate with satellite maps to provide advanced tracking.

## Improve field communications and productivity

Dispatchers can locate the closest vehicles or personnel to where they are needed – to reduce fuel usage, allocate assets most efficiently, streamline work shifts and improve customer service.

## Secure

Access to your StreetTrek Web service is protected via secure user login.

## Hosting

Your StreetTrek Web data must be hosted on a StreetTrek server product.

## Customizable webpage

Your company's StreetTrek Web page can be customized with your logo and graphics.

Contact us today to find out how StreetWeb can help you better manage your mobile and portable assets.
